

New planting  
method using fabric pots

Manufactured with **highly resistant, UV treated fabrics.**

Allows you to **grow any type of plant or tree.**

**Protects roots from extreme temperatures,** so they can benefit from an aerated grow, avoiding circular growth and increasing density.

They can be used in different types of soil and climates.

**Durable, washable, reusable and recyclable,** they are a fully sustainable product.

Ideal for plants and vegetable patch transportation.

Yes, a vegetable patch! They are perfect for collection and storage, thanks to their excellent features.
